

Welcome to *Sign Live! CC*

Sign Live! CC is a signature application based on the CABAReT Stage framework for working with PDF and other formats with particular focus on electronic signatures in single and batch processes. In accordance with the German Digital Signature Law (SigG) and the German Signature Ordinance (SigV) *Sign Live! CC* is accredited for creating qualified electronic signatures (QES).

Security Instructions

Since qualified electronic signatures are in many fields considered the legal equivalent to handwritten signatures, **please regard the provided security instructions!**

Security instructions for the installation of this product can be found in this document and in the online documentation.

Security instructions for the configuration and use of this product can be found in the online documentation.

License

This product is property of *intarsys GmbH*. Details about license conditions can be found in the accompanying End User License Agreement (EULA.pdf).

Information about the license conditions for integrated third party products can be found in the sub-folder *doc\3rd_party_licenses* of the installation folder *<CABHOME>*.

For test purposes you may use this software without license key. In this case some functions will not be available or work in a restricted way.

To use the entire set of functions you have to install a license key. Contact our sales to receive a duration restricted demo license key or buy the software to receive an unlimited license key via email.

Support

Further detailed information can be found in the online documentation included upon delivery, which are available through the application's 'Help' menu. Further information and contacts can be found on our website under <https://www.intarsys.de/>.

Thanks and Credits

Sign Live! CC would not have been possible without the support of numerous persons and organizations:

Adobe Systems Incorporated

The data structures and functions used in *Sign Live! CC* comply with those of the PDF reference and fall under the Copyright of Adobe Systems Incorporated.

The Apache Software Foundation

This product includes software developed by the Apache Software Foundation (<http://www.apache.org/>).

Bitstream Vera Fonts

This product includes fonts developed by Bitstream, Inc. (<http://www.gnome.org/fonts/>).

Bouncycastle

This product uses functions of the Bouncy Castle Crypto package (<http://www.bouncycastle.org/>).

Eclipse

This product includes software developed by the Eclipse Community (<http://www.eclipse.org/>).

Freetype

Parts of this software are license protected © 1996-2002 The FreeType Project (<http://www.freetype.org/>). All rights reserved.

Microsoft

In Windows environments this product installs, for sole use by *Sign Live! CC*, the Microsoft component GDI+, if not already present.

Mozilla

This product uses Rhino as JavaScript interpreter.

URW

URW was kind enough to provide the fonts delivered with the product.
